The group developed a set of strategic objectives:

- Build the capacity of each school to manage their own social/emotional behaviors using the resources available within each school**
- Provide consistency to character education across the district**
- Provide proactive as well as reactive strategies for supporting the social and emotional health of students**
- Develop a process for early identification and intervention for students at risk socially, emotionally and behaviorally, including building the capacity of staff to recognize students at risk**
- Develop systems of community involvement to include Juvenile Probation, the Department of Health and Welfare, and Children's Mental Health**
- Develop a system of self-evaluation and accountability related to serving the social, emotional and behavioral needs of students within the district**
